

# Please summarise how this event helped or informed you?

To provide and encourage support workers in my team with relevant development opportunities

This has helped inform me of the opportunities to develop the support workforce - next steps and action plan for me in my trust

was good to find out the experiences of someone who has gone through the support worker foundation degree

It is massively helpful in strengthening our roles as support workers in physiotherapy

Excellent clinical update and great to see so many associates involved and engaged. Keep up the good work

Great to find out about the band 5 role.

I enjoyed the feeling of unity - I am actually a clinical practice educator, but thinking back to my assistant days, I would have loved this opportunity

Useful as a team lead for me to use to inspire and motivate our support workers

Enthused me about the importance of our support workers and the role I could play in supporting their development. I'd be particularly interested in how our support workers could support physiotherapy students (next time hopefully).

# Please summarise how this event helped or informed you?

Useful information to help qualified staff support our assistants who I know I would be lost without and he did learnt a lot from during my career as a Physiotherapist. Interesting to hear about the Welsh Apprenticeship.

Interesting presentations regarding how to value support workers more

It has encouraged me to step up and be brave and innovative in my role. It has given me confidence that I am supported and appreciated as a support worker and that there is scope to continue to progress in my role. Thank you

It made me feel valued as a therapy tech band 3

I was very interested in the levelling up to Band 5 and will be looking at the capabilities stuff on the web page

Thankyou for tonight, Ive enjoyed all of the presentations and a great way of networking. look forward to part two. The presentations were informative and a great way to see what is going on around the uk. Thankyou

Excellent networking opportunity and learning from others. Really looking forward to the student discussion as well. Great ways to focus for our SW

Valuing support workers and optimising capacity.CPD- Covid 19 and PVF

This event provided me with in-depth information regarding what the CSP has to offer as I am new into specific physio role. It has also highlighted other ways to develop further beyond my band 4 post. I'd love more information on this

# Please summarise how this event helped or informed you?

This event gave a good overview of the varied professional qualifications now more widely available but also the varied roles support workers have. Good CPD element on Covid-19 recovery and how the support worker can influence the patient recovery

# If we held another event for Associates and Support Workers in the future how could the event content be improved?

Perhaps sharing of varied roles  
Competencies  
Structure for progression

Tonight was fantastic using the same type of formula would be perfect

I'd prefer if we were given slides/summary of how support workers can help students as was particularly interested in this- I know you ran out of time!

It had great content keep it up.

Not sure

maybe to have a little bit of time to mind map together as a group what future themes would be well received. But for tonights event, the student learning is next on the agenda.

A little more interactive

I don't think it could be. Professionally led and a broad programme to interest everyone

It was great. I think keep towards process and opportunity rather than clinical information (although Chris's talk was great)

# If we held another event for Associates and Support Workers in the future how could the event content be improved?

I felt today's event was great. Current and relevant topics. Well done.

It's been great with a variety of learning from presentations to polls and chat function is great to see what others are doing around the UK. Same again please :)

Provide more information on apprenticeships for band 4 practitioners or ways to develop further without the qualification

Content was good no improvement, Good mix of speakers, voting, and CPD element. :))

It couldn't, it was very good and enjoyed the guest speakers

If you are not yet a CSP Member, has this event convinced you to join (please skip if already a member)
